Framing & Clearances

Minimum Fireplace Clearances

Maintain these minimum clearances to combustibles from appliance and vent surfaces:

- Non-combustible appliance finishing:
  - 2 1/2" (64mm) to the top of the appliance opening
  - 3 1/2" (89mm) from the side of the appliance opening

Combustible appliance clearances:

- 2 1/2" (64mm) to the top of the appliance opening
- 3 1/2" (89mm) from the side of the appliance opening
- 2 1/2" (64mm) from the bottom of the appliance to the ceiling
- 7/8" (22mm) from the bottom of appliance to the enclosure top

**WARNING**

Do not build into this area - it must be left clear to provide adequate clearance for the vent in the 14" (365mm) wide area centered along the front of the fireplace. No combustibles are allowed. Fireplace should be in its final location before framing.

**Minimum Vertical Vent Rise**
