FIND YOUR HAPPY (fire)PLACE.

Throughout the ages, people have gathered around fires to share in life’s greatest joys.

There’s just something about the glow of flickering flames that makes special moments feel even warmer.

A Napoleon fireplace is uniquely designed to brighten the vibe of any room in your house. Napoleon has an incredible range of designer options to fit any vision.

A fire not only raises the warmth and ambiance of a room, it can raise the value of your home. A fireplace offers some of the highest returns of any remodeling project. And that should make you feel good all over.

And so you can keep enjoying that positive glow for years and years and years to come, every Napoleon fireplace is backed by the President’s Limited Lifetime Warranty.
Banff™ 1100 & Banff™ 1400

Heating up to 2,000 sq. ft.

Napoleon’s cast iron stoves feature advanced wood burning technology that provides you with the cleanest, most efficient heating experience. They also feature a design that boasts a European style, a decorative door with ceramic glass and a large view of the fire. Built with confidence to last with fully welded seams and using the highest quality materials; all covered under the Napoleon President’s Limited Lifetime Warranty. The Banff 1400 & Banff 1100 are the perfect wood burning stoves for those wanting a reliable heating source year after year.

The Banff 1400 shown in painted metallic black finish
Napoleon is proud to offer the world renowned quality of their clean burning wood technology at an economical price. The Independence™ EPA wood burning stove provides the best value for your money - the same clean burning and efficient Napoleon EPA technology, reliability and performance but in a “dressed down” version that includes the pedestal base and metallic black cast iron door making it ready for installation! The non-catalytic high tech design eliminates the need for a delicate ceramic catalytic combustor, which can deteriorate over time. Take control of your independence from the utility companies and save money heating your home!

**Independence™ - 1450**
Up to 70,000 BTU's
25½"w x 33¼"h x 27"d

Help Protect The Environment With A Napoleon Wood Burning Stove or Insert
Heating your home with a Napoleon high efficiency, EPA (Environmental Protection Agency) approved fireplace, stove or insert releases no more carbon dioxide than a dying tree would lying on the forest floor. In fact, when the entire carbon cycle is considered, a Napoleon EPA approved stove or insert heats your home more efficiently and with less impact on the environment than any other heating fuel option.

Dual Vortex™ Action
To achieve an extraordinary clean burn without a catalytic combustor, horizontal jets of super heated secondary air are mixed with the fire’s smoke to burn off released smoke particles. You can actually watch the spirals of secondary flames just below the top baffle during most of the burn.

Vortex™ Baffle - Lifetime Warranty*
Manufactured from high density material, Napoleon’s exclusive Vortex™ baffles provide an unprecedented level of durability while ensuring complete combustion resulting in a clean burning, environmentally friendly wood burning stove.

Secondary Air Tube - Kiln Construction
Napoleon’s secondary air tube is insulated with ceramic fiber and protected with a cover plate, ensuring complete combustion. This fully lined refractory firebox acts as a kiln, concentrating the maximum amount of heat to efficiently heat your home.

WHISPER QUIET™ Blower System
The extreme heat resistant “H” class bearings featured in Napoleon’s superior heat circulating blower, creates a lasting “whole home” comfort with adjustable high & low speeds.

*See dealer for details
Napoleon’s EPA Technology
Wood Burning Stoves
1. Economical 6” flue on even the largest models, assures you of efficiency and cost saving installations
2. Primary “bottom air feed” assists in cold start ups and to revive a small, dying fire
3. Secondary air tube insulated for complete combustion
4. Wrap around side shields add a delicate balance of elegance and functional practicality helping to disperse heat evenly and reduce clearances to combustibles
5. Large viewing area through an elegantly arched cast iron door
6. High heat ceramic glass provides a safe, unobstructed view of the fire
7. Effective airwash in combination with high temperatures keeps the viewing glass clean
8. Fully refractory lined firebox, similar to a kiln, maintains the interior temperatures necessary to achieve low emissions
9. Ash dump with self-closing door is readily accessible (pedestal & cast iron models)
10. Large “king size” functional ash pan (600 cubic inch capacity) with two carrying handles lets you conveniently dispose of ashes (included with pedestal and optional for leg models)
11. Folding ash pan lid allows for clean, no-mess ash removal (pedestal models)
12. Cool room air is circulated around the firebox, heated and returned to the room
13. The single lever burn control regulates primary and secondary air establishing a perfect mix and a clean burn

Napoleon’s EPA Wood Burning Technology... more heat with less fuel. Emissions as low as 2.8 grams per hour and 69.8% overall maximum heating efficiency.

Wood Burning Inserts
1. Radiant Heat
2. High heat ceramic glass provides a safe, unobstructed view of the fire
3. Heavy duty secondary air tubes introduce just the right amount of air to increase efficiency through complete combustion (specific for the EPI3C, EPI3T & EPI3TN)
4. Cool room air is circulated around the firebox with help from circulation blower, heated and returned to the room
5. Combustion air is brought into the unit through the fresh air intake collar located on the top left outer shell
6. Combustion takes place inside the firebox, smoke and gases are moved around a baffle system into a second chamber for complete combustion and extended flame path and exhaust out the chimney
7. Primary “bottom air feed” assists in cold start ups and to revive a small, dying fire
8. A single air control regulates the burn rate
**Options, Features & Accessories**

**Door Options**
- Arched Painted Metallic Black Finish
- Arched Satin Chrome Plated Finish

**Trivets**
- Painted Black Finish (included)
- 24 Karat Gold Plated Finish
- Satin Chrome Plated Finish

**Outstanding Features of Napoleon’s Reliable Cook Top Surfaces**
Napoleon’s 1400 and 1400C both feature a reliable cook top surface allowing your Napoleon wood stove to double as a cook stove. Perfect for power failures!

**Lift Top Lid**
Cast iron hinged lid conveniently lifts up to allow pots or kettles to rest directly on the hot surface of the actual stove top. (Banff 1400 only)

**COOKMATE**
The unique grid pattern moulded into the cast aluminum captures and retains the maximum amount of heat and transfers it directly to your frying pan or pot. The optional COOKMATE simply replaces your existing trivet. (Huntsville 1400 only)

**Leg Options**
Traditional steel leg available in metallic black or elegant cast iron leg available in satin chrome plated or metallic black finishes.

**Spring Door Handles**
Spring door handles are available in painted metallic black, brass or satin chrome plated finishes.

**Ash Drawer Kit Option**
Optional for the leg models, 1100ML and 1400ML allows you to dispose of ashes quickly and easily.

**Outside Air Kit Option**
Wood burning appliances need air to burn and often compete with other appliances in the home. The outside air kit helps balance indoor air pressure by ensuring sufficient combustion air is fed directly to the wood burning stove.

**Heat Circulating Blower**
When you want to extract the maximum amount of heat, an optional heat circulating variable speed blower offers increased heating efficiency. An optional sensor control automatically turns the blower on and off. With Oakdale 1101, 1402, Contemporary and Traditional inserts, WHISPER QUIET heat circulating blowers with automatic thermodisc and variable speed control are included with the units.

If the stove is to be installed on a combustible floor, it must be placed on an approved non-combustible hearth pad, that extends 8” (200mm) beyond the stove sides and back, and 18” (455mm) to the front. Clearances can be reduced with shielding acceptable to local authorities. Reduced installation must comply with NFPA211 or CAN/CSA-B365.

* Rated BTU/h with softwood test fuel (for emissions only) - no refueling
** Wolf Steel Ltd. own test results showing realistic BTU’s using hardwood logs with regular refueling. Heat output will differ on chimney draft as well as type, moisture content and size of wood.
*** Figures may vary with individual conditions such as floor plan layout, insulation value/heat loss of the house, geographical location and firewood used.
